SPEECH-LANGUAGE, FEEDING, AND OCCUPATIONAL THERAPY

**C**reative Speech Solutions, LLC (CSS) is an innovative, multidisciplinary therapy center that's home to a team of highly-knowledgeable professionals.

A creative, warm, and pleasant environment, CSS enables children of all developmental levels to reach their maximum potential. Members of the practice have been nominated as "Favorite Kids' Docs" since the campaign's inception; this year, 11 of the therapists were recognized.

Along with speech-language, feeding, and occupational therapy, CSS offers music therapy, nutrition consultations, literacy and academic services, as well as social skills and feeding groups. The practice

always coordinates care with teachers and physicians.

It also runs Camp PAL (Play And Learn), a summer camp for children with mild- to moderate-speech, language, social, sensory, and fine motor delays. "We're passionate about providing the best full-service therapy care for our patients—and having some fun in the process," says founder Cynthia Marrapodi. "We're a family here at CSS, and it shows in our work. Our parents agree 100 percent!"
