PEDIATRIC THERAPY CENTER

Social Skills Groups

Our dynamic, fun, and effective social groups are designed for children ages 4-18 who need to improve their social communication (e.g., play skills, conversation skills, body language, perspective taking, problem solving, emotional regulation, and flexible thinking).

Groups incorporate therapeutic programs such as **Social Thinking®** and **The Zones of Regulation.®** All groups follow a plan

that is individualized for the needs of the participants.

Prerequisite skills necessary to participate in any of these programs include:

Ability to sit and attend without teacher direction

Ability to follow 2-step directions

Ability to verbally communicate basic wants and needs

Ability to use simple sentences

Groups are held on Saturdays in 6-week sessions during the school year.

Visit our website www.creativespeechsolutions.com and click on the Services tab to learn more about our groups.

Parents who are interested should call to schedule a free 15-minute screening to determine his/her child's readiness for a group and the most appropriate placement.
